DOKUMENTASI TUGAS HTML iTRACE

Link github pages : <https://chesyamd.github.io/pemweb/tugas2/>

Link repo : <https://github.com/chesyamd/pemweb.git>

1. Alasan Struktur Semantik

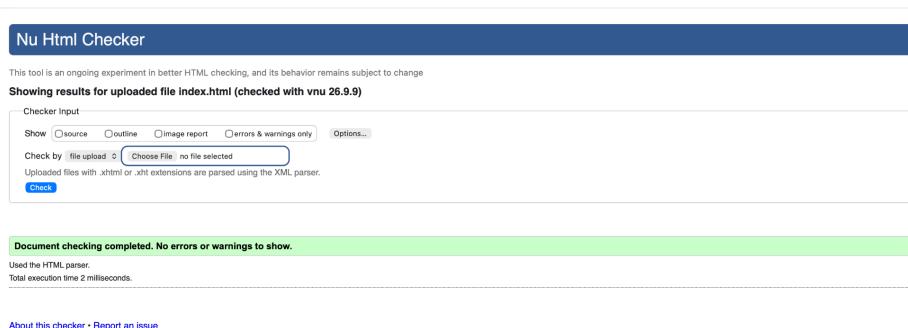

Pada pembuatan website iTrace, saya menggunakan struktur HTML semantik seperti <header>, <nav>, <main>, <section>, <article>, <aside>, dan <footer> karena lebih mudah dipahami oleh browser dan teknologi pendukung serta membantu meningkatkan aksesibilitas dan SEO. Elemen <header> digunakan untuk bagian atas website yang berisi logo dan identitas website. <nav> digunakan untuk menu navigasi. <main> digunakan sebagai bagian utama halaman, sedangkan <section> digunakan untuk mengelompokkan konten berdasarkan bagian tertentu. Elemen <article> digunakan pada halaman berita karena berisi konten berita yang berdiri sendiri. <aside> digunakan untuk informasi tambahan yang berkaitan dengan konten utama, sedangkan <footer> digunakan untuk bagian bawah website.

2. Tantangan dan Solusi

Salah satu tantangan dalam pembuatan website adalah menentukan elemen HTML yang sesuai untuk setiap bagian halaman. Untuk melewati tantangan tersebut, solusi yang akhirnya didapatkan adalah menggunakan elemen semantik berdasarkan fungsi masing-masing bagian. Struktur halaman dibuat dengan <header>, <nav>, <main>, <section>, <article>, <aside>, dan <footer>. Selain itu, setiap file HTML diperiksa menggunakan W3C Validator untuk memastikan tidak terdapat kesalahan pada struktur dan sintaks HTML.

3. Hasil Validasi

Validasi index.html :

The screenshot shows the Nu Html Checker interface. At the top, it says "Nu Html Checker". Below that, a small note states: "This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change". The main heading is "Showing results for uploaded file index.html (checked with vnu 26.9.9)". Under "Checker Input", there are checkboxes for "Show" (source, outline, image report, errors & warnings only) and an "Options..." button. The "Check by" section shows "file upload" with a "Choose File" button and the text "no file selected". A note below says "Uploaded files with .html or .xht extensions are parsed using the XML parser." and there is a "Check" button. A green banner at the bottom states "Document checking completed. No errors or warnings to show." Below this, it says "Used the HTML parser." and "Total execution time 2 milliseconds." At the very bottom, there are links for "About this checker" and "Report an issue".

Validasi berita.html :

Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for uploaded file berita.html (checked with vnu 26.9.9)

Checker Input

Show ☐ source ☐ outline ☐ image report ☐ errors & warnings only [Options...](#)

Check by [file upload](#) [Choose File](#) no file selected

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

[Check](#)

Document checking completed. No errors or warnings to show.

Used the HTML parser.

Total execution time 2 milliseconds.
